Subject: Microsoft Settlement.

Judge Kollar-Kotally:

I have recently read a brief concerning the proposed settlement of the Antitrust violations committed by Microsoft and I believe they do nothing to punish or prevent Microsoft from continuing to violate the laws of our country. As a user of the computer I believe that all companies participating in that business should be able to play on a level field. Microsoft has over the past 5 to 7 years prevented the computer field from being anything but level. I strongly request that the present Proposed Final Judgment (PFJ) be evaluated and changed to a meaningful finding of a company that has truly been found guilty of severe antitrust violations.

Respectfully
Joseph L. Parrillo
